

LOAD-MASTER *LM-W* Wireless Options

LD1 Large Display

High Visibility 100mm digits
Wall or suspension mounting
Displays sum of multiple load cells

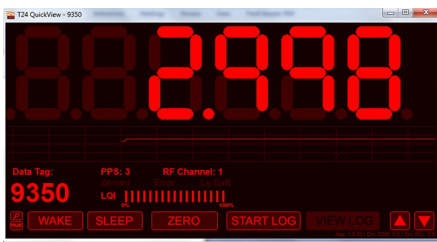

LD1 provides high visibility remote display of loads to a range of 100M. Powered by 11-30VDC and sealed to IP65, it can display the sum of multiple load cells and be used in conjunction with portable hand-held displays. Dimensions 434 x 196 x 77mm.

HA Multi-Channel Display

Connect to up to 12 load cells
Displays individual load cell readings
Displays sum of multiple load cells

HA is available as a replacement for the standard portable hand-held indicator supplied with LOAD-MASTER *LM-W* load cells. Powered by 2 x AA 1.5V batteries and sealed to IP65, it will scroll through individual readings from up to 12 load cells, or display the sum of all load cells. Ideal for multi-point overhead weighing, load balancing, or centre of gravity calculation.

BSU PC Measurement System

Connect to up to 24 load cells
Displays individual load cell readings
Data logging to external file

BSU allows direct to PC measurement from multiple load cells. Using the wireless USB module, no external power is required. Option to wake or sleep each load cell and tare individual channels. Data can be logged to file and exported to other applications for viewing or analysis.
